PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	<p>Abstract: -Add aim of the study here. -Add a knowledge of material and methodology here. -Why use abbreviations in the Key Words.</p> <p>Material and Methods: - It should be emphasized why the acute pain that is the subject of the research was chosen, which population it affects, and its importance.</p> <p>Results: -Numerical values obtained based on clinical data should either be presented as a table or written more descriptively. Especially in this type of case studies, the most important presentation should be in this section.</p> <p>Suggestions: - I think there are some suggestions at the end of the discussion section. However, in order to present a complete suggestion, it would be more appropriate to do this under the "suggestions" heading.</p>	<p>Noted</p> <p>Revised accordingly</p>
