PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. The introduction part appears like reading a book on tibial hemimelia. The author fails to justify the title . The research question “ Challenges in management in a resource constrained region”need to be emphasized more elaborative.2. Challenges in resource constrained regions like socioeconomic status, parental education, etc. in an available scale can be used for objectifying the data.3. Authors description about 1st case: Absent of Limb length discrepancy is very unlikely happened in Type Ia tibial hemimelia as two limbs can never be similar. Presence of associated Radial club hand in that patient needs special discussion as overall prosthetic rehabilitation in future require a reasonable fair hand function for use of walking aids with bilateral prosthesis.	Done Noted
Minor REVISION comments	<ol style="list-style-type: none">1. What type of rehabilitation management done because of constrained in resources need to be explained.2. Needs some language correction in the manuscript.	
Optional/General comments	Good attempt of the authors describing a extremely rare congenital anomaly of lower limb	Okay

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
