

Review Form 1.6

Journal Name:	Asian Journal of Orthopaedic Research
Manuscript Number:	Ms_AJORR_87917
Title of the Manuscript:	Percutaneous retrograde screw fixation of the acetabulum: A case report
Type of the Article	Case report

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajorr.com/index.php/AJORR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Please have the same text font throughout the entire manuscript I suggest changing the aim of the study: " The objective of this study was to present a case of XXX and highlight the feasibility and interest of percutaneous screw fixation in minimally displaced acetabular fractures. " I suggest describing what "defenestration" means "The postoperative course was simple" this sentence doesnt make sense - please revise " After eliminating a life-threatening emergency" please revise this sentence - it doesnt make sense in English.	I thank you for your remarks, and I confirm that I have corrected the manuscript accordingly.
Minor REVISION comments	Consider starting the discussion section with the main finding of your case report and not with a general statement. "Advancements in percutaneous fxation techniques" - please change "fxation" with "fixation" " Morphometric variations of this corrodor have been" please change "corrodor" with "corridor"	I thank you for your remarks, and I confirm that I have corrected the manuscript accordingly.
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>	There is no ethical issues.
