PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. I do believe that this study advances the field of commentary because it outlined clearly the areas of application of probability theory and its importance, but there are a few points that need further clarifications to the reader's benefits. Below are the points.2. The purpose of the study should be explicitly stated in the abstract.3. The conclusion is unclear please rewrite the conclusion	
Minor REVISION comments	<ol style="list-style-type: none">1. There is the need to check for some grammatical errors for example, under section 3 line 3 of page 3, paragraph 4 on page 5.2. If necessary, I humbly recommend that some literature to be included under section 3.3. There are few issues of typographical errors that must be checked.	
Optional/General comments	I would like to start by giving the author(s) complements for their thorough job with this manuscript. I think this is an exemplary piece of work. Next to the fact that the replication is well thought-out and planned according to the necessary steps and that I agree that there is replication value. The manuscript showed clearly where probability theory is applied and the importance of probability theory. In summary, I recommend this manuscript be accepted.
