### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajpcb.com/index.php/AJPCB/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p><b>The title does not include the location of the study and specific target population The abstract does not give a background on what the study entails. Does not say which specific clinics (OPD or Antenatal or family planning clinics) participants were recruited from</b></p> <p><b>Problem analysis from the introduction does not link well with the aim of the study and the rationale did not come out clearly.</b></p> <p><b>It is unclear whether the attitude of providers were sought because it is stated in the Aim statement but not the title and not in the results</b></p> <p><b>In the methods, the study design, sampling method were <u>not described</u>. Outcome Variables being studied were not clearly defined</b></p>	Modified as suggestion
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	<p><b>There are some few punctuations and construction of the sentences that would have to be corrected</b></p>	Corrected

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p> <p>The paper does not state whether ethical approval was given by any ethical review board before the study and whether participants consent were taken</p>
