

## Review Form 1.6

Journal Name:	<a href="#">Asian Journal of Research and Reviews in Physics</a>
Manuscript Number:	Ms_AJR2P_89277
Title of the Manuscript:	Domain Structure in Ferroelectric Thin Films
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajr2p.com/index.php/AJR2P/editorial-policy> )

### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	Please provide the global issue that prompted the researcher to conduct the study. Please check format reference style. Some have no book titles	<ul style="list-style-type: none"><li>- After going through some articles that had been published, we discovered that most studies in ferroelectric thin films were experimental and where theoretical studies are involved, most studies focus numerical simulations which is a good approach but for the fact that numerical simulations involve approximation of quantities, which a limitation to theoretical studies. This motivated the authors to look purely at an analytical approach taking advantage of the new mathematical approach in the study of nonlinear systems. This correction has been effected in the abstract.</li><li>- All book titles have been included. All authors cited in the work have been properly referenced in the reference page.</li></ul>
<b>Optional/General</b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
