

## Review Form 1.6

Journal Name:	<a href="#">Asian Journal of Research in Cardiovascular Diseases</a>
Manuscript Number:	Ms_AJRCD_84964
Title of the Manuscript:	A rare case of early infectious endocarditis after surgical patch closure of atrial septal defects revealed by acute limb ischemia
Type of the Article	Case report

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>A. Please re state the title</p> <p>Suggestion: Acute limb ischemia as a complication of an early infetious endocarditis after an atrial septal defect patch closure</p> <p><b>B. Abstract in case report should have the following</b></p> <p><b>1. Summary of case</b></p> <p><b>2. Problem it addresses</b></p> <p><b>3. Implications</b></p> <p>C. Introduction :</p> <p>Should include a description and overview of the topic , related literature. This should establish the importance and uniqueness of the case</p> <p>D. Case presentation Should include</p> <p>1. patient demographics</p> <p>2. history of illness</p> <p>3. physical examination findings</p> <p>4. test results confirming diagnosis</p> <p>5. treatment plans</p> <p>6. outcome</p>	<p>A: the title has been changed as suggested</p> <p>B: The abstract has been modified in order to highlight problems and implications. This manuscript was written to report a very rare complication of surgical ASD closure. Screening for endocarditis in patients with systemic embolism and a history of atrial septal defect patch closure is mandatory even though endocarditis is a rare complication. Therapeutic approach in case of systemic emboli and large vegetation often requires surgical removal and replacement of the closure patch.</p> <p>C: an overview related literature was added to the introduction in order to show the uniqueness of the case.</p> <p>D: the case presentation was modified according to the subtitles; more information was added to enrich the case.</p>
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	No there is no ethical issues in this manuscript
