Scientific names aren't always made Italic.</p> <p>Use the Equation format from Office Word, it's very helpful. In addition, add numbers for each equation.</p> <p>Correct “References” – they are written in different styles, colours etc. Also, they are not always correctly mentioned in the text – “Busungu et al., 1991” instead of “Busungu and Mushobozy, 1991”; “Lale, 2003” instead of “Lale and Vidal, 2003”.</p> <p>“Discussion” is replacing the “Conclusions”?</p>	<ul style="list-style-type: none">• I will check the font, color, alignment, spacing and spelling mistakes.• I will go through to see that all scientific names are in italic.• I will use equation format and number the equations.• I will have to change my referencing style, and see that they are mentioned correctly in the text.• I will look at the discussion again to see if it actually replaces the conclusion.
