Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajrdes.com/index.php/AJRDES/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The title is inaccurate, I suggest: "Psoriasis and Metabolic Syndrome: a gender case-study clinical correlation"</p> <p>The main link between Metabolic Syndrome and Psoriasis is Leaky Gut Syndrome or Intestinal Hyperpermeability. This topic was not discussed by the authors, nor the fact that Psoriasis is nowadays considered an endotype of Atopic Dermatitis. I added these topics and references to the introduction.</p> <p>The abstract was redundant, and with references. I shortened it a little to be more specific.</p> <p>There were more than 400 corrections made in the manuscript, that you can appreciate in the control panel of the reviewed manuscript attached.</p>	<p>1. The Title has been changed as suggested by Reviewer.</p>
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<p>(If yes, Kindly please write down the ethical issues here in details)</p>	<p>No Sir, the study was done after ethical approval of the IRB Jinnah Post Graduate Medical Centre. The questionnaire and data collection was revised before the commencement of study.</p>
