PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|---|
| Compulsory REVISION comments | The subject of manuscript is interesting, but the only thing they report on the antibacterial activity are the inhibition halos. It is recommended that the MIC and MBC be determined, the authors can apply the dilution micro-technique and use TTC as an indicator of cell viability. It is also recommended to determine if the extract has a bacteriostatic or bactericidal activity. The time kill curve of bacteria is carried out to observe the bactericidal or bacteriostatic action Further observations are included in the manuscript. | Noted |
| Minor REVISION comments | | |
| Optional/General comments | | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| Are there ethical issues in this manuscript? | (If yes, Kindly please write down the ethical issues here in details) | |
