PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I read with interest the manuscript submitted to me for review. The problem of exposure to COVID-19 for HCWs is relevant and certainly dentists are particularly exposed. On the other hand, the manuscript has some non-negligible defects that need to be amended. 1) The type of vaccine used is not indicated 2) Are the adverse effects of the vaccine after the first or second (or even) third dose? 3) There is no question as to why they did not get vaccinated (and 15% seems to me to be a non-negligible percentage)	1. Type of vaccine was- Covishield 2. Adverse effects – after the first and second dose . 3. Probably they got the first dose of vaccination and second was still due .
Minor REVISION comments	page 6, line 8: N95 mask what does it mean?	77% of the practitioners wore both N 95 mask and surgical mask as well .
Optional/General comments	In the text there are several errors (of spaces or typing) that I have tried to correct.	THANKS A LOT

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	NO ETHICAL ISSUES
