PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	The study shows interesting data about the association of the genotype variant rs9939609 with obesity in Niger Delta tribes as well as a significant association between other variants with type 2 diabetes regardless of body mass index, especially the genotype variants rs886052102 and rs201041270. ; The data shown may be of interest to researchers in the area and provide information about a problem of global importance such as diabetes. The results of this research serve as a basis for future research and to be able to understand the etiology or propose possible protocols in the diagnosis, prognosis and treatment plans of patients with type 2 diabetes. It is suggested to accept the manuscript without changes due to a correct elaboration and drafting of the same, complying with the parameters established in terms of the methodology and development of the work.	Thank you. However, minor corrections have been made as suggested by other reviewers.

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	No ethical issues.
