PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Materials and methods - (Materials and methods): Justify the application of the Chi-square test.	1. The chi-square test was preferred because pneumothorax is an independent variable associated with mortality, it is a non-parametric test, and the statistical relationship between independent variables is significant. This section has been revised.
Minor REVISION comments	2. Introduction - (Introduction): Contextualize the problem under study	2. The introduction section was updated according to your suggestions.
