PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is an unusual report of a 40-year-old woman who was initially diagnosed clinically and radiologically as case of multiple hydatid cysts with cholelithiasis which after surgery was found to be cholelithiasis with multiple schwannomas treated successfully with complete excision. Individually both are themselves an uncommon entity separately. This is reportedly the first case report of multiple intra-abdominal Schwannomas mimicking as disseminated hydatid cysts.	
Minor REVISION comments	Perhaps could make some English and grammatical changes.	Noted sir. Grammatical and English language corrections done. Page no. 1
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	No ethical issues with this manuscript.
