EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
I would like to get data on return to investment . How much farmer has to invest /acer and how much extra income he will get from the recommended practices. Also it will be useful if the trial is done for three seasons to know statistical significance of recommended practices This is essential to maintain international standard of our journal	I tried to revise again. According to the editorial comments, It needs reviewed papers treatments, but as a review paper treatments setup might not be mandatory. Thank you for your encouragement,
