### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The author would need to clearly state in the abstract the comparative analysis done. Literature review is necessary for one to know the contribution to the body of knowledge and justify the discussion of findings. The actual contribution needs to be clear from the problem statement.	The abstract was revised accordingly. The literature review is provided in the introduction part.
<b>Minor</b> REVISION comments	Clear hypotheses. need be stated with the ANOVA. Proper paragraphs should be done together with the alignment from the topic.	“Do the math self-report levels of secondary school students differ significantly according to the grade variable?” supposed to be clear.
<b>Optional/General</b> comments	doing the chi-square non parametric tests would make the study more rich in findings.	Thanks.
