Journal Name:	<a href="#">Asian Research Journal of Agriculture</a>
Manuscript Number:	Ms_ARJA_87692
Title of the Manuscript:	Abundance and Diversity of Coccinellid Predators in Rice Field Ecosystem in Payakumbuh District, Indonesia
Type of the Article	Review Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	1. MATERIALS AND METHODS  - (Material and Methods): Is the Shannon-Winner index the most appropriate estimator for this case? Explain	Yes. Because we analyzed the biodiversity index of coccinellid predator in rice field
<b><u>Minor</u></b> REVISION comments	2. CONCLUSION  - (CONCLUSION): Is it possible to identify any pattern?	Yes It is..because we concluded the result of research. According on the research, we know the diversity of coccinellid predators in rice field
<b><u>Optional/General</u></b> comments	3. ABSTRACT  - (Shannon-Winner diversity index): Justify the use of the Shannon-Winner index.	Shannon-Wiener index was conducted to analyse the diversity and evenness index of species. In this case, the diversity coccinellid predators in rice field.

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
