PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The audit report leaves certain questions unanswered- 1) What is the meaning of 'good hospital facility'? 2) Numbers are less to derive a conclusion regarding safety and efficacy of hysterectomy. 3) There is no uniformity of indication for surgery. TLH done for adenomyosis cannot be compared to VH done for prolapse. 4) Variables like BMI, history previous surgery like caesarean section and other coexisting morbidities which can have an effect on the outcome of surgery, have not been taken into consideration/mentioned. 5) What was the average duration of surgery in each category? 6) What were the per-operative findings? – Any adhesions due to Endometriosis/PID/previous surgery. 7) What post-operative care was provided? 8) When was ambulation allowed?	1. Good hospital facility means availability of modern hospital technology, devices, and support system; 2. Statement related to this valuable suggestion is added in conclusion section
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
