| Compulsory REVISION comments | The objective and selection of research problem is good ,During the reviewing process , I have found that, sentences are not cleared<br>Proof reading to be necessary for cross checking entire manuscript | I quite agree with most of the corrections which are recommended to me by this reviewer. He has taken his time to do a thorough job. However, I do not agree with few of the grammatical corrections such as the ones under the sub heading of Algorithm (page 6), the payoff matrix (page 10) and result (page 10). Also, I prefer the arrangement of the work under 'terms used in game theory' and 'data analysis' to be the way I arranged them. |
