PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Please justify the level of 22% CP in finisher phase. (other than energy nutrient composition is same for starter and finisher diet)</p> <p>Please also give the composition of diet (2.5% less ME) offered to groups T2 to T5</p> <p>There is NO CHANGE in EE digestibility even after supplementation of Emulsifier then how it improved performance?</p>	<p>1. Considering the ME reduction so the CP level kept same.</p> <p>2. Composition of diet (2.5 % less ME) Given in revised manuscript as per suggestion.</p> <p>3. Although percent digestibility EE is numerical similar but the absolute digestibility is much higher in emulsifier added groups as compared to without supplementations.</p>
