

Review Form 1.6

| | |
|--------------------------|--|
| Journal Name: | Current Journal of Applied Science and Technology |
| Manuscript Number: | Ms_CJAST_88248 |
| Title of the Manuscript: | Effect of Nutrient Levels and Weed Management on Weed Control Efficiency, Grain Yield and Economics of Mustard |
| Type of the Article | Original Research Article |

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|------------------------------|---|---|
| Compulsory REVISION comments | <div>1- Why is there no table that includes the types of weeds spread in the experiment?</div> <div>2- Why is there no table containing the number of weeds before treatment and after treatment with the pesticide?</div> <div>3- The weight of the dry grass was not calculated</div> | <div>1. Table 1 & Table 2 which showed types of weeds i.e., Broad leaved, sedges and grasses have been included.</div> <div>2. Among weed management practices, weedy treatment (W₁) has been considered as before treatment of herbicides and rests of the treatments has been considered (W₂, W₃, W₄, W₅, W₆, W₇, W₈) as after treatment of herbicides.</div> <div>3. Table 1 & Table 2 which showed the dry weight of weeds i.e., Broad leaved, sedges and grasses have been incorporated.</div> |
| Minor REVISION comments | Support the results with up-to-date references | The results have been well supported by the references. |
| Optional/General comments | <div>1-There is no table that includes the components of the crop</div> <div>2-reinforce conclusions</div> | <div>1. Table 6, Table 7 & Table 8 which showed the components of the crop have been incorporated.</div> <div>2. Conclusion has been well drawn.</div> |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
