

Review Form 1.6

Journal Name:	International Astronomy and Astrophysics Research Journal
Manuscript Number:	Ms_IAARJ_84326
Title of the Manuscript:	Jet Internal Pressure and Luminosity of Powerful Radio Galaxies
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Accept As It Is	
<u>Minor</u> REVISION comments	No Revision	
<u>Optional/General</u> comments	This manuscript entitled “ Jet Internal Pressure and Luminosity of Powerful Radio Galaxies ” is very interesting. This manuscript show that certain physical processes (such as jet internal pressure and luminosity) which occur in radio galaxies may be propelled by both the source central engine and dark energy. This manuscript has been well written following the way of writing an Original Research Article. All references have been properly and correctly cited. The results and discussions have been presented properly according to the rules of good and correct writing. I suggest that the conclusion be written separately from the discussion, so that the reader can easily identify it. I believe that the author has adequate understanding and knowledge of the issues covered in this manuscript.
