

Review Form 1.6

Journal Name:	International Journal of Advances in Nephrology Research
Manuscript Number:	Ms_IJANR_84146
Title of the Manuscript:	Evaluation of the Therapeutic potential of Ethanol Leaf Extract of Anacardium occidentale in the management of experimentally induced kidney damage in Wistar rat
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijanr.com/index.php/IJANR/editorial-policy>)

Review Form 1.6

PART 1: Review Comments

	Reviewer's Comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">➤ Result and discussion section must incorporate more evidential citations in support of the nephroprotective action of ethanolic extract of <i>Anacardium occidentale</i> with special mention of few specific bioactive compounds responsible for its therapeutic effect.➤ Magnification of histological images must be mentioned in explanation of plate 1-5 in the result section.➤ Conclusion section must be incorporated to highlight the significance of research study and provide future directions.	Thanks for your very productive contributions,the needful has been done
H	<ul style="list-style-type: none">➤ Discussion section must be modified with incorporation of more relevant references to improve the validity of results of the study.➤ More latest references should be incorporated in the manuscript.➤ Reference section must be formulated in uniform style as per journal guidelines.	Noted
Optional/General comments	<ul style="list-style-type: none">❖ Manuscript is 'Strongly Recommended for Publication' in the "International Journal of Advances in Nephrology Research" due to comprehensive compilation of research study carried out on therapeutic effect of ethanolic leaf extract of <i>Anacardium occidentale</i> in management of experimentally CCl₄ induced kidney damage in Wistar rat.❖ Current research article has emphasized the nephroprotective action of novel ethanolic leaf extract of <i>Anacardium occidentale</i> against experimentally CCl₄ induced toxicity through biochemical analysis of urea and creatinine concentration along with histological analysis of kidney of Wistar rat treated with CCl₄ and different concentrations of plant extracts.❖ 'Abstract' and 'Introduction' sections have been formulated very precisely emphasizing need and significance of the scientific study in health science.❖ Methodology section has been provided with appropriate experimental design.❖ Results tables and histological plates have been combined with appropriate discussion but lacking proposed underlying mechanism of action of <i>Anacardium occidentale</i> extract against CCl₄ induced nephrotoxicity.❖ Conclusion section is completely missing and must be incorporated in revision version of the manuscript.❖ Reference section incorporating necessary latest citations written in uniform style is required for publication in international journal.	Thanks for your observations and inputs, all observations have been observed. Conclusion has been addressed.
