PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">➤ First of all please mention geographical coordinates of study area in manuscript.➤ Mention type of irrigation method which was used in this field experiment.➤ In result part, please mention the availability of nitrogen and organic matter in treated waste water because in every parameter nitrogen availability is affecting the observed value.➤ In case of Crude fiber content author is indicating that there is no availability of nutrient in ground water so please mention the availability of NPK in ground water as well as other water quality parameters.➤ Please mention the total amount of water applied to the crop for verifying water saving statement in result part (type of water mostly will not affect water requirement of crop). Also indicate how much water saving you has done by using treated waste water (as mentioned in result conclusion part).	Comment accepted and considered
Minor REVISION comments	<ul style="list-style-type: none">➤ Please due care of grammatical errors throughout the manuscript. Check your whole manuscript line by line in this regard.	okay
Optional/General comments	Please cross check references in literature and citation part in manuscript.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
