PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Not revealed	
Minor REVISION comments	Not revealed	
Optional/General comments	Article's relevance is due to climate change that is a serious global environmental problem, primarily caused by increasing concentrations of greenhouse gases, aerosols and other pollutants in the atmosphere. The article deals with the study of the climate change impact on rice yields. The authors analyzed individual characteristics, nature of temperature and precipitation changes over the period of the experiment, as well as the predicted variation of maximum and minimum temperature and precipitation. The article meets scientific papers' requirements and is recommended for publication.	We would like extend our sincere gratitude for your valuable comments.

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, kindly please write down the ethical issues here in details)	No ethical issues with submitted manuscript.
