### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Can be published after improvement according to suggestions	
<b>Minor</b> REVISION comments	<ol style="list-style-type: none"><li>1. Writing bibliography should be consistent (for example, some use brackets for a certain year and some do not use brackets)</li><li>2. It should be written KKF and KKG classified as high, medium and low with reference. Similarly, for the value of heritability and expected genetic progress.</li><li>3. It should be emphasized in the discussion, if heritability is high and genetic progress is high, when the selection is carried out and what selection method is best used. What if, high heritability, moderate or low expectation of genetic progress?</li></ol>	I have done the suggested corrections.....
<b>Optional/General</b> comments	Articles can be published with minor improvements	Ok
