<b><u>Compulsory</u></b> REVISION comments	Thank you for providing me the opportunity to review the paper on projected climate changes over the Cauvery Delta Zone. I enjoyed the short piece and I found the paper to be well organized and well written. The key references are cited, the abstract is informative, the length is fine, the methods are appropriate, the graphics are publishable (more than publishable – they are very nice), and the results are interesting. I found the entire effort to be of the highest quality.	Thanks for the comments.
<b><u>Minor</u></b> REVISION comments	Throughout the paper, change “degrees Celsius” to “°C”	Corrections have been made and it has been changed to °C.
<b><u>Optional/General</u></b> comments	Expand the title to include “Eastern India”	Southern India has been included in the title instead of eastern India. Since Tamil Nadu is located in the southern part of India.
