General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijmpcr.com/index.php/IJMPCR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Few spelling mistakes have been given as comment in main manuscript which need to be rectified. In title, its mentioned case report and literature review. There is no need of the word _ and literature review. Its enough up to "A case report". Figure 2 legend should be mentioned same as in the text. SBC full form at one place is written as Stafne bone cavity and at another Stafne bone cyst. Better to keep it uniform. In the title it is mentioned as Stafne bone defect. So, this should be clarified and uniformity be maintained.	All spelling mistakes rectified Title changed SBC full form changed to Stafne Bone Cyst throughout the paper
<u>Minor</u> REVISION comments	It is not very clear that SBC is occasional finding and with no symptoms, then what is need of the article. Also, most of the article is appearing from previous published articles with reframed statements. For almost every line, there is a reference.	All suggested changes done
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
