

## Review Form 1.6

Journal Name:	<a href="#">International Journal of Pathogen Research</a>
Manuscript Number:	Ms_IJPR_88089
Title of the Manuscript:	New Protein settings to support in vivo antimalarial activity in Plasmodium berghei infected mice after Garlic-Arteether Therapy
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijpr.com/index.php/IJPR/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<b>What do mean about arteether? Do you mean artemether?</b>  <b>The author must review the introduction and the introduction is very short in the article.</b>	Yes, it is <b>arteether</b> only, not artemether. This derivative of artemisinin, I have been using from two decades in my studies on "Combination therapy for malaria". Both are derivatives of artemisinin. This article introduction which gives brief survey and justification of work done according to the authors guidelines of this journal and has more than 550 words. I feel change is not required in this part.
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	<b>On the other hand, Can you use onion or mix ( Garlic and onion ) in this experiment?</b>	<b>We can try.</b> But, we are the first group to show antimalarial activity of <b>garlic</b> in combination with arteether (where my interest is). Now, we are interested to know the mechanism of this combination. We have shown, garlic acts as immunomodulator, and preset article hint us to try, PPIA as good target to control malaria.

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	Ethics Statement has been INCLUDED IN THE MATERIALS AND METHODS of the manuscript and numbers of subheadings have been changed accordingly.
