### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>A brief of the methodology should appear in abstract. Important results also should feature in the abstract.</p> <p>The introduction has no problem statement or clear research justification. It is also disjointed.</p> <p>Methodology: Why no replication was adopted on the field was never mention? I think this kind of experiment should have replications in order for the results to be reliable.</p> <p>Discussion did not emphasize the implications of this level of variability for different traits on plant breeding programs.</p>	<p>Necessary information added in the abstract</p> <p>Aim of research paper included in the introduction</p> <p>We have conducted experiment in un-replicated augmented block design as mentioned in materials and methods</p>
<b>Minor</b> REVISION comments	<p>My comments above should be addressed. Other suggestions are included in the paper.</p>	
<b>Optional/General</b> comments
