### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments		
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments	<p>This review aimed to compile the main existing studies on the effects and responses of <i>Carthamus tinctorius</i> to drought and the mechanisms that this plant uses to adapt to water stress. Overall, the review is well written and discusses the most interesting topics about the adaptive mechanisms that <i>C. tinctorius</i> uses. The introduction is well written, the development of the review is also considered appropriate, as it addresses the main factors associated with resistance to water stress and possible implications. The conclusion and perspectives are also appropriate for the study.</p> <p>Thus, after evaluating it, I consider that the study can be recommended for publication in its entirety to the International Journal of Plant &amp; Soil Science,</p>	Okay
