**PART 1: Review Comments**

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments		
<b><u>Minor</u></b> REVISION comments	Improve the abstract: insert the objective in the abstract;  Improve the Introduction: Avoid the quote at the beginning of the sentence, as it has only one number and does not look good in the text. Put the objective of the work in the last paragraph of the introduction;  Improve Results and Discussion: I would like to see more interaction in the text between the results and the discussion;  Avoid “described by [8]” and “outlined by [12]”, insert author's name, because it looks better in the text;	As suggested by the reviewer the introduction and abstract are improved and the objectives were included.  The results and discussion were also added.
<b><u>Optional/General</u></b> comments	The manuscript is good, but it needs to improve on several points. The author needs to review and improve all the points mentioned above for his article to continue in the publication process.	All the mentioned points are improved.

**PART 2:**
