

SDI EDITORIAL COMMENTS FORM

EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>Aim of work is not well articulated. Number of participants 14; This is a small number to achieve a conclusion. Statistical analysis is not appearing. Results does not written in text-form. References within the text are not written correctly. References in section of references are not written correctly; most of them missed the journal names, volume and pages.</p>	<p>This is a qualitative phenomenological study that does not require a larger sample. It is a different study from a quantitative study. In a qualitative study, the results are not quantified and therefore there are no static results.</p>
