PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	There is major issue that I indicate below, Abstract is missing, what the author(s) indicates is not an Abstract; that makes unclear what purpose or objective of the work is. It is confusing when author(s) in the so called Abstract, add Introduction, Methodology and Result. That must be removed before going any further.	Abstract is no more structured
<u>Minor</u> REVISION comments	Two types of letters in page 2. Misspelled words in page 2 as well. There is no need to read this manuscript to be aware that sentence "Zika virus infection is an emerging viral infection with global public health outcomes hence the need to address and nip it in the bud"; therefore, it cannot be a conclusion. It is important to mention that this manuscript comprehends only norther Nigeria; so, it is a very local study.	This is noted
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
