## Review Form 1.6

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>I commend the author for writing this article. The paper was very comprehensive and complete. I appreciated that.</p> <p>I recommend the following revisions:</p> <p>1. In the Abstract, eliminate the following words: Background, Results, and Conclusion. In addition, delete the results paragraph but make sure you mention the total number of participants. Rule of thumb for the Abstract: It should not exceed more than one paragraph. The paragraph will identify the study, the methodology used, and followed by results and conclusions.</p> <p>2. I would recommend moving the tables in the article where they belong instead of putting them at the end of the article.</p> <p>You might consider adding the following for future expansion:</p> <p>1. Replicating the same study in different environment outside WHO to see if you are receiving the same results. This will help you generalize if your study applies only to Medical students or the entire population in Yemen.</p> <p>2. Replicating the same study in different country to make comparison of the population.</p>	<p>Thank you for your comments</p> <p>1. Regarding the structure of the abstract, we had followed the one published in this Journal and according to the guideline instructions for the author.</p> <p>This is an example to be followed.</p> <p><b>"International Journal of TROPICAL DISEASE &amp; Health, Page 12-17</b>  <b>DOI: <a href="https://doi.org/10.9734/ijtdh/2022/v43i130567">10.9734/ijtdh/2022/v43i130567</a></b>  <b>Published: 5 January 2022"</b></p> <p>2- Tables were presented as per their appearance in the text <b>DONE</b></p> <p>3. 1. <b>Done</b></p> <p>3.2. <b>Done</b></p>
<b>Minor</b> REVISION comments	<p>1. Please make sure a complete outsider proofread your paper. There were few typo and grammatical errors.</p> <p>2. Please do not use page 19. Instead using the Acronym list, you need to integrate them in your article. For example, "World Health Organization (WHO)."</p>	
<b>Optional/General</b> comments	Congratulations. It is a very timely and good study and I commend you on that.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
