PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>[1] Only four sample are not sufficient to evaluate the treatment of the water system</p> <p>[2] It would be better to show the map of study area and justify why you have chosen these sampling points.</p> <p>[3] Literature and references are not sufficient to justify your research work</p> <p>[4] There is no international flavor in your work. Compare your work with other international works.</p>	These issues have been addressed. Four samples were used because of financial constraints however they were taken from strategic locations.
Minor REVISION comments	<p>[1] How to write pH value or total dissolved solids</p> <p>[2] There are many grammatical mistakes in the paper. Probably, it is due to the converting pdf to word file.</p>	These issues have also been addressed.
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	There are no ethical issues
