PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article majorly comprises of grammar mistakes. I strongly suggest for grammar and spellings corrections in the paper. There are various technical mistakes like lack of unit for acidity, using unit for specific gravity which is unit less. Besides this paragraphing has been done without considering the point of discussion example in case of 'Introduction'. Most of the word are interchangeably used in American English fashion which seems to be incorrect, writing the manuscript in a single format (British English) will enhance its essence. The result and discussion has to be promoted with description , and by comparing with facts mentioned by earlier researchers. I also suggest to go through the result related to the texture of whine . The liquid products do not have texture. References format is incorrect also the mentioned one's are very old. Those must be updated.	Update have been made
Minor REVISION comments		
Optional/General comments	Major revision is required	Minor revision was been made
