In equation (2), why the applied electric field and the electron pressure gradient neglected?</div> <div>3. Why Jz is considered to be zero?</div> <div>4. On page 3, you assumed $\frac{\partial w}{\partial z} = 0$ (justify it) and how you got $w = -u_0$?</div> <div>5. To examine the validity of the method the authors should construct a table showing comparisons with already published results.</div> <div>6. On page 5 equation (21), for the 2nd and 3rd equations you used $\bar{t} > 0$ for both(how is that justify it).</div> <div>7. In equation (6) and (7), g defines what?</div>	<div>Revision made</div> <div>Done</div> <div>Revision made</div>
