

Review Form 1.6

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_88872
Title of the Manuscript:	New Fantastic Curves Discovered from Rectangular Hyperbola
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljamcs.com/index.php/JAMCS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The topic of the work deals with analytic geometry. The authors study remarkable curves on rectangular hyperbola, in particular, they give a cubic algebraic curve. The calculations and geometric constructions are elementary, clear and correct. The main results are Theorem 1 and 2, in the first they present a new planar algebraic curve and in the second a way to construct a geometric object to detecting the range of the divisor-ration. Since the authors used some software, it would be wise to put somewhere the specific requirements they used.	Noted
<u>Minor</u> REVISION comments	Special comment The calculations at work are correct and clear. For the introduction to be more complete, I recommend putting in linea 27, The main goals of the paper are Theorem 1 and 2, and write a couple of lines highlighting their importance.	All Corrections has been done
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
