PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">The conclusion says that the strength of this study comes from the validity of the steps that have been tested and proven. There is no evidence to back this up. In order to give us a clear answer, we need to see proof, like data on workers in the environment we're studying who had COVID-19 for a long time. It can be shown in a table or a graph.The limitations of the research can be suggestions for further research with different methods. Please put it in the conclusion.	Given the offshore is a closed environment, transmission and prevalence should have been higher than found in the study, this meant the measures implemented by this company [pages 6 and 7] worked in mitigating the spread. Limitation included accordingly.
Minor REVISION comments	<ul style="list-style-type: none">In the reference section, there is still a lot of data that is missing. A journal doesn't even have a specific name. It also doesn't have a specific number of pages. Please fill in the information.	Aligned.
Optional/General comments	<ul style="list-style-type: none">reorganize the table	Table re-positioned.

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
