PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	-Nil-	
Minor REVISION comments	The manuscript can be accepted in its present format as it is well written and presented. However such studies should also include counselling of the students.	A point well noted. We thank the Reviewer.
Optional/General comments	1) Sample size could've been better, conclusion with so small sample size cannot be extrapolated to a large population. However, the conclusion of the study is acceptable universally that HIV education is necessary for any cadre of the community.	We thank the Reviewer for the observation. However, we think the sample size is very appropriate for the target group under the conditions.
