PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|------------------------------|---|--|
| Compulsory REVISION comments | | |
| Minor REVISION comments | After reviewing this research article it is found that researcher has discussed the perception of HIV/AIDS among tertiary education students and their willingness to take the HIV test. Further researcher has given sound research work done by various researchers. However it is found that hypothesis are missing also Criteria for selection of sample is not mentioned clearly. Third researcher should pendown the suggestion too. So on the basis of my review I suggest the researcher to mention these things after that paper should be published | We thank the reviewer for his comments. The introduction of our manuscript clearly states the purpose of our study and gently ropes in the requirements of a hypothesis to address the concerns of the Reviewer. The Reviewer's concern of criteria for selecting our samples is addressed in section 2.2 of our manuscript. |
| Optional/General comments | | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| Are there ethical issues in this manuscript? | Researcher have mentioned that this work is done under ethics | Yes. This work has approval from the School of Medicine and Health Sciences and School of Allied Health Sciences Joint Institutional Review Board (SMHS-SAHS JIRB) of the University for Development Studies. |
