## Review Form 1.6

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)															
<b>Compulsory</b> REVISION comments	<p>Patients with confirmed COVID-19 infection can develop several psychological consequences, therefore I agree this issue is crucial. Based on the University of Wisconsin's review article guild lines , I evaluate this manuscript.</p> <table><tr><th></th><th>Items</th><th></th></tr><tr><td>1</td><td>Introduction and background</td><td>The authors have explained the issue and provided the necessary background information.</td></tr><tr><td>2.</td><td>Body of the paper</td><td>The process of searching the relevance articles have been explained in methodology section. However, it would be good for the author to elaborate further the methods that used to filter and analysis the articles. The author could use figures or table to present the synthesis of the finding. The conclusion of two major issues such as sleep quality and progressive muscle relaxation to cope with anxiety is based on two major articles. It is lack of reliability and it is difficult to be generalized as the authors only mentioned the experimental evidence from Wuhan, China.</td></tr><tr><td>3.</td><td>Conclusion</td><td>The authors have concluded the major finding brief and precise.</td></tr><tr><td>4.</td><td>Further research</td><td>The authors have provided suggestions for further research.</td></tr></table>		Items		1	Introduction and background	The authors have explained the issue and provided the necessary background information.	2.	Body of the paper	The process of searching the relevance articles have been explained in methodology section. However, it would be good for the author to elaborate further the methods that used to filter and analysis the articles. The author could use figures or table to present the synthesis of the finding. The conclusion of two major issues such as sleep quality and progressive muscle relaxation to cope with anxiety is based on two major articles. It is lack of reliability and it is difficult to be generalized as the authors only mentioned the experimental evidence from Wuhan, China.	3.	Conclusion	The authors have concluded the major finding brief and precise.	4.	Further research	The authors have provided suggestions for further research.	<p>Corrected</p> <p>Done revision</p> <p>Done</p> <p>Amended</p>
	Items																
1	Introduction and background	The authors have explained the issue and provided the necessary background information.															
2.	Body of the paper	The process of searching the relevance articles have been explained in methodology section. However, it would be good for the author to elaborate further the methods that used to filter and analysis the articles. The author could use figures or table to present the synthesis of the finding. The conclusion of two major issues such as sleep quality and progressive muscle relaxation to cope with anxiety is based on two major articles. It is lack of reliability and it is difficult to be generalized as the authors only mentioned the experimental evidence from Wuhan, China.															
3.	Conclusion	The authors have concluded the major finding brief and precise.															
4.	Further research	The authors have provided suggestions for further research.															
<b>Minor</b> REVISION comments	<p>A little bit of grammatical issue.</p>																
<b>Optional/General</b> comments	<p>Good effort.</p>																

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
