PART 1: Review Comments

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	I consider that the investigation had a good design and a good handling of the procedure. I suggest trying to reduce the text a bit, for example, the calculation of the sample size could only be referred to the method used without the need to describe it in such detail. Likewise, the ethics procedure could be referred to in fewer words.	The calculation of sample size determination using the formula has been deleted, leaving behind only the calculated sample size only. The ethical approval section has also been reduced, removing the detailed process of obtaining the approval
Optional/General comments	Check grammatical issues Check journal formatting	

PART 2:

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	The ethical aspects are adequately described.
