Review Form 1.6**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This an original study on health professional's lifestyles and their health.</p> <ol style="list-style-type: none">1. Present complete study location in the title (State and country – Dominica?).2. Follow journal-specific guidelines for manuscript setting.3. Write in full abbreviations when used the first time.4. Correct unclear/hanging sentences as indicated in the reviewed document.5. Unless otherwise, write the manuscript in past tense.6. Remove results in methods section.7. Data collection section: has mixed presentations of collection and analysis; making it difficult to comprehend.8. Keep the number of respondents constant: 76.9. Why are the staff and students regarded the same in this study? Are they the same and, therefore, have same factors for their observe behaviors? I think they need to be analysed differently!!! Check.10. Follow journal-specific guidelines for presenting results.11. Start sentences with a word not numbers.12. Why only age is presented in Figure 1 and not the other characteristic mentioned in the narrative. BTW, why only two characteristics: sex and age considered important in this study versus others like income which could influence say, alcohol taking.13. In the narrative, it is stated respondents get 1-4 hours of sleep a category that is not in Figure 1 and the majority get 5-6 (48.7%) and the least, 1.3% get 9+ hours of sleep. Correct this confusion.14. Use one unit of alcohol and water consumed: little or bottle (Table 2).15. Do the staff and students consume same type of alcohol (Table 2)?16. Is use of taxi on a daily basis a sedentary behavior? <p>I suggest the author(s) do the re-analysis separating the two populations that are quite different to be lamped in one basket. This will push for rewriting the manuscript according to journal-specific guidelines and then submit for re-review.</p>	<ol style="list-style-type: none">1. Done2. Done3. Done4. Done5. Done6. Done7. Done8. Done9. Dear Editor, thank you for noticing the mistake, it was an error on our part . We had a different study for the staff which is not included in this . Thank you10. Done11. Done12. Dear Editor, the other information was presented in a tabular form rather than graphs . But we can include the graphs if needed . Also, in our study we didn't take into account income .Thank you13. Done14. Done15. Dear editor, we made a mistake considering the staff since they have their own study which is not included in this journal. Thank you16. Dear Editor, while designing our questionnaire, we considered it a sedentary lifestyle because of the geographic location of student housing and the school
Minor REVISION comments	Manuscript editing highly recommended.	Done
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	No, informed consents was obtained from participants
