Manuscript Number:	Ms_JAMMR_85072
Title of the Manuscript:	Diagnostic Value of Trans-vaginal Sono- Elastography in Discrimination of Cervical Neoplasms
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljammr.com/index.php/JAMMR/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Cervical cancer is considered one of the important types, so studying any method of diagnosing it is important, even if it is primitive. Therefore, the work is good as a preliminary initial diagnosis, but it is not approved by a large percentage. It was supposed to determine the extent of the benefit of this method if the number of samples was greater and using another method as a comparison with it.	Noted
<b>Minor</b> REVISION comments	, the idea is good as a preliminary initial diagnosis but the number of sample is less	Thanks
<b>Optional/General</b> comments	Its good	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
