### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The article brings a review of a very important topic for the rural community in a region of Nigeria: Maternal mortality of rural women. Sad and worrying situation. Thus, I believe that the publication of this work may awaken the authorities to resolve this political and economic situation in these communities. However, I suggest that this review remain only as a literature review, since the systematic review requires strict criteria for statistical analysis of the data etc ... which was not done in your work.</p> <p>Please note some suggestions in the text.</p> <p>Check too, the bibliographic references cited in the text.</p>	<p>Thanks, for your comments. Other criteria for systematic review were met, except statistical analysis. This was not done because included studies were heterogeneous, hence, results were presented narratively.</p> <p>Noted.</p> <p>Checked.</p>
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
