PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In the abstract- CT scan is described as the gold standard for diagnosis of AD. CT aortogram is the gold standard. In the introduction- Incidence is 2.6 to 3.5 per.. not 2,6 to 3,5. In the case report- ECG does not show LVH by any criteria. In the discussion- At least some mention should be made of the role of endovascular repair (even if not indicated in this specific case).	AGREE
Minor REVISION comments	Case report- Lisinorpiil 10 od should be 10 mg once daily . Instead of "we elected to perfume directly a cardiac CT scan with contrast", the sentence should be- "we elected to directly perform a cardiac CT scan with contrast". Tense should always be past- instead of "The origin of the left subclavian artery, celiac trunk, and left renal artery seems to be involved", it should be "The origin of the left subclavian artery, celiac trunk, and left renal artery seemed to be involved". "He remained, asymptomatic" should be "He remained asymptomatic," , i.e. comma should be after asymptomatic.	AGREE
Optional/General comments	---	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
