

Review Form 1.6

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_87237
Title of the Manuscript:	A Comparative Study On Influence Of Epidural Volume Extension On The Block Characteristics Of Subarachnoid Plain Bupivacaine For Lower Abdominal Surgeries
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">• Research Papers should follow the structure of Abstract, Keywords, Abbreviations, Introduction, Methodology, Results and Discussion, Conclusion, Acknowledgements, Competing Interests, Authors' Contributions, Consent (where applicable), Ethical approval (where applicable), and References plus figures and/or tables.)• Guideline for Reporting <i>P</i> values:<ul style="list-style-type: none">i) <i>P</i> is always italicized and capitalized.ii) Correct expression: (<i>P</i> = .05). Wrong Expression: (<i>P</i> < .05), unless <i>P</i> < .001.iii) The <i>P</i> value should be expressed to 2 digits whether or not it is significant. If <i>P</i> < .01, it should be expressed to 3 digits.iv) When rounding, 3 digits is acceptable if rounding would change the significance of a value (eg, <i>P</i> = .049 rounded to .05).v) Expressing <i>P</i> to more than 3 significant digits does not add useful information since precise <i>P</i> values with extreme results are sensitive to biases or departures from the statistical model.• References<ul style="list-style-type: none">i) Adapt the bibliography according to the guidelines for the author (e.g. 1. Hilly M, Adams ML, Nelson SC. A study of digit fusion in the mouse embryo. Clin Exp Allergy. 2002;32(4):489-98.ii) Note: List the first six authors followed by et al.iii) Note: Use of DOI number for the full-text article is encouraged. (if available).iv) Note: Authors are also encouraged to add other database's unique identifier (like PUBMED ID)v) References must be listed at the end of the manuscript and numbered in the order that they appear in the text. Every reference referred in the text must also present in the reference list and vice versa. In the text, citations should be indicated by the reference number in brackets [3].• Writing style<ul style="list-style-type: none">i) It is preferable to leave a space between the number and the unit of measurement (e.g. 10 ml not 10ml)ii) The names of drugs must always be written, in the text, not in capital lettersiii) If you include an author's name in the text, you must write the surname, first name initial et al. (e.g. Mochamat H et al.)iv) Numbers with decimals must have a decimal point (e.g. .)v) Decide whether to use min or minutes - correct the whole text <p>ABSTRACT:</p> <ul style="list-style-type: none">• Please insert the full form of each abbreviation in parentheses at first use in the text (e.g. SEVE, S, T) <p>ABBREVIATIONS</p> <ul style="list-style-type: none">• Please insert the abbreviation of T4=thoracic vertebra 4; L3=lumbar vertebra 3; C8= cervical vertebra 8 (?); BP= blood pressure; SPSS= statistical package for social sciences• Please modify SP0 (zero)2 in SPO2 – decide whether to put the 2 in subscript or not. Correct throughout the text <p>INTRODUCTION</p> <ul style="list-style-type: none">• Modify “Background” in “Introduction”• Put the Latin worlds in italic (e.g. <i>in situ</i>) <p>METHODOLOGY</p> <ul style="list-style-type: none">• Methods should be changed to Methodology• Insert the reference of Mallampati score systems <p>RESULTS AND DISCUSSION</p> <ul style="list-style-type: none">• Put together Results and Discussion• Pay attention to how the numbers are written. Choose how many digits after the dot (.)• Delete text and leave only abbreviations if already used (e.g. PACU, MAP)• Insert safety and adverse events data (as partly reported in discussion)• Table: pay attention who in written the <i>P-Value</i>• Figure 7 correct the “axis title”	<p>These are reflected already</p> <ul style="list-style-type: none">i. Doneii. Doneiii. Doneiv. Donev. Done <p>All Reference issues sorted.</p> <p>All writing issues were addressed but for one: “names of drugs always be written, in the text, not in capital letters.” I think it will be cumbersome doing this. Imagining writing SEVE as ‘Subarachnoid plus Epidural volume extension’ in the entire text? This is why we made an abbreviation paragraph to help with this.</p> <p>I am not clear on iv</p> <p>Abstract issues addressed</p> <p>All Abbreviation issues addressed</p> <p>All Introduction issues addressed</p> <p>All methodology issues addressed</p> <p>All Results and Discussion issues addressed</p> <p>I am not sure if putting both together is accurate as your example online has both splits. Please verify again and let me know. Thank you</p>

Review Form 1.6

Minor REVISION comments	n.a.	
Optional/General comments	Well done and clear work	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
