PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Multiple thoracic hydatidosis with pulmonary, cardiac and pulmonary artery involvement is a rare condition and its prognosis is serious. Therefore, early diagnosis and management of cardiac localizations is very important. This case report highlights Multiple pulmonary hydatidosis with cardiovascular localization. Well compiled and supported by empirical findings. Only the 2nd figure subtitle remains in french, it needs to be corrected in English.	Totally agree, the 2 nd figure has been translated in the reviewed version. Thank you for your review.
Minor REVISION comments		
Optional/General comments	Multiple thoracic hydatidosis with pulmonary, cardiac and pulmonary artery involvement is a rare condition and its prognosis is serious. Therefore, early diagnosis and management of cardiac localizations is very important. This case report highlights Multiple pulmonary hydatidosis with cardiovascular localization. Well compiled and supported by empirical findings. Only the 2nd figure subtitle remains in French, it needs to be corrected in English.	Totally agree, the 2 nd figure has been translated in the reviewed version. Thank you for your review.
